Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election without traverse of claims 1-16 in the reply filed on 09-28-2005 is acknowledged.

Claims 17-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 09-28-05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1,4,5,10,11,13-16 are rejected under 35 U.S.C. 102(a) as being anticipated by Goodman et al 339'. Note figures 8 and figure 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,3,6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goodman et al in view of Mahoney et al. Goodman et al teach the claimed subject matter except for showing use of IR sensing of the processing parameters. Mahoney et

al, in column 12 lines 46 plus, teach that IR sensing of identical parameters in a plasma processing system is conventional, dependent on the end use of the device, (spectroscopy), and in view of this teaching it would have been obvious to modify the Goodman et al system with infrared sensing, if needed, this need dependent on the end use of the device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Escalera et al, Lys et al are cited for disclosing inventions of interest to the instant disclosure.
